

# Team Performance

## **Define the optimal type of team for the task, create team identity and increase performance**

Participants in management teams and project teams are often a given, based on capabilities and availability at the time of team establishment.

Due to the composition of the team or the mere fact that a common purpose, performance goals or approach has not been established to hold the team mutually accountable, team performance will be low.

- Does your management team not see the purpose of meeting?
- Does your project team work in silos and blame each other for lack of results?
- Does your team appear as inefficient and lacks creativity?

## **Consulting and seminars will assist the client in**

- Establishing whether a team has the potential to become a high performance team or if it makes more sense to create an effective working group.
- Defining rules to enhance performance.
- Developing tools to increase efficiency.

## **Target groups**

- Top Management teams
- Management teams
- Project teams
